IMPORTANT REQUEST FROM YOUR WATER SUPPLIER

Dear Water Customer:

The Environmental Protection Agency (EPA) recently announced changes to drinking water regulations requiring water suppliers to identify all materials used in the construction of the water system. The goal of these changes is to identify and remove all lead pipes in the drinking water system. The water supplier must identify all construction materials used on both the supplier and customers' side of the water meter. We are going to need your help to do this. **If you can successfully complete the attached survey by August 15, 2024, the City of Hoisington will give you a discount of \$10 off your water bill (this is limited to one discount per account.)**

The Kansas Department of Health and Environment (KDHE) is mandating water suppliers to submit the completed information before October 16, 2024. If the required information cannot be gathered from the homeowner, KDHE may require the water supplier to excavate private lines to identify them. This would be time-consuming, expensive and damaging to lawns and landscaping. To avoid this, we need your help to complete this requirement. Please complete the attached survey and return it to us as soon as possible.

Thank you for your assistance!
